

Education that Expands Beyond the Classroom Building the Future

Date: June 2-3th, 2026

Time: Check-In June 2nd, 7:15am; Program Completion ~2:30pm June 3rd

Location/ Facilitating Party: Patriots Point Naval and Maritime Museum

Direct Contact Hours: 20

Applicable for: 3rd – 12th Grade South Carolina Educators

Registration Required: [register by May 22nd, 2026; registration is open](#)

Objectives:

- To demonstrate the integration of social studies, science, math, and ELA as it relates to the Patriots Point Naval and Maritime Museum's collection in alignment with South Carolina College and Career-Ready Standards
- To demonstrate WWII as an entry point into exploration of cross-curricular concepts
- To demonstrate the value of community institutions to classroom learning

Overview:

Patriots Point Naval and Maritime Museum's Education Department, along with its curatorial staff, has created a suite activity-filled workshops and sessions with the Museum's Collection to highlight connections to in-classroom learning across disciplines based on South Carolina State Standards. Creative connections to the classroom will leave educators ready to "Build the Future" with plenty of material to take back to their students, while also demonstrating the value of informal learning institutions in the community. This immersive, overnight experience is free** and includes meals and lodging aboard the USS Yorktown. Participants will receive a certificate of completion. Reach out to Hannah Kratz, HKratz@patriotspoint.org, with any questions.

** does not necessarily include parking

Themes include: navigation, celestial navigation, supply chain and underway replenishment, global connections, a serviceman's daily life including biological and weather-related hazards, creative writing, STEAM, Flight Academy, engines, physical science, inquiry
